

Silver Series Turntable Mobile Phone Mounting Kit

Set-up Guide

Along with the purchase of the Mobile Phone Mounting Kit, you would have received:

- A. Turntable Mount (+3 screws to mount to the Turntable motor stem collar)
- B. Stem Riser (+1 screw to mount to 'Turntable Mount'):
- C. Connectors:
 - o Lightning Mount (compatible with Apple phones & tablets)
 - o USB Type C Mount (compatible with newer Android phones & tablets)
 - o USB Micro Mount (compatible with older Android phones & tablets)

Getting Started with the Mobile Phone Mounting Kit

Users will first want to remove the master platform of the turntable, this can be done by removing the 3 center screws then lifting the top off.

After the turntable master platform has been removed, you will connect the 'Stem Riser' to the 'Turntable Mount' using the single screw (insert this into the underside of the Turntable Mount and connect to Stem).

Next, use the 3 screws that were used to mount the turntable platform to connect the Hanging Kit Mount to the center stem:

Last, connect a 'Connector' to the 'Stem Riser' by screwing this into the top of the Riser.
